

Equitable Life victim?

Are you an annuitant bewildered by the latest news and feeling betrayed by your board? Or one of the million policyholders to have been damaged by the 'death by a thousand cuts'?

When the Society closed two years ago, after nine years of consistently rising share prices, it had a huge shortfall of more than £3 billion. That's what policyholders have been made to bear in full. This scandal was due to a decade of mis-management and mis-regulation. Over and over the regulators have failed us. The Treasury should own up and pay up.

Equitable is at the centre of the crisis in pensions but our board, the FSA and the Parliamentary Ombudsman have not stood up for policyholders. Why? You might well write and ask your MP.

Support the only properly constituted group for policyholders past and present. **Join EMAG to fight for Government compensation.**
